WHAT WE ARE GOING TO TALK ABOUT...

- **EMERGENCY PLANNING-TRAINING PROGRAMME**
- PATIENT CENTRED PATHWAY
- **TECHNOLOGICAL INNOVATION**

EMERGENCY PLANNING TRAINING PROGRAMME

When Playmobil can save lives...

PATIENT CENTRED PATHWAY – WHAT'S NEW?

Organisational Innovation in Healthcare Management - Agora 2017

15

Moving treatment out of the hospital

HOSPITALISATION AT HOME

- to cover the gap between the hospital and everyday life
- an offer to patients who are stable after hospitalisation
- originated in palliative care
- teams of doctors, nurses, midwives, physiotherapists, occupational therapists, psychologists and social workers coordinating the care and treatment related to specific conditions
- expected to expand as a result of reorganisation of health care

WHY ?

CRITERES MEDICAUX ?

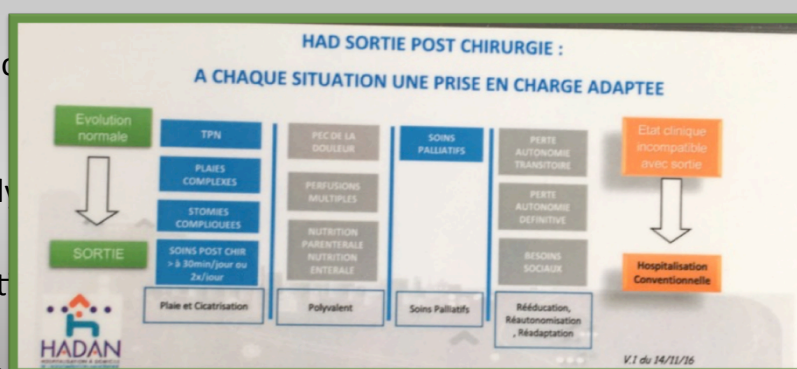

1 critère = HAD envisageable

- ☐ Soins palliatifs
- ☐ Traitement antalgique = IV, SS Cut
- ☐ Traitements intraveineux = AB, autres
- ☐ Nutrition : IV, GEP, SNG
- ☐ Administration de chimiothérapie (IV, SS Cut, PO)
- ☐ Surveillance de chimiothérapie
- ☐ Surveillance de radiothérapie
- ☐ Surveillance d'aplasie
- ☐ Pansements complexes
- ☐ Thérapie à pression négative
- ☐ Stomie compliquée
- ☐ Surveillance après intervention chirurgicale
- ☐ Rééducation orthopédique (5x/semaine)
- ☐ Rééducation neurologique (5x/semaine)

Plusieurs critères = HAD envisageable

- ☐ Oxygénothérapie ou VNI
- ☐ Suivi psychologique ou social
- ☐ Soins de nursing
- ☐ Rééducation orthopédique (3x/semaine)
- ☐ Rééducation neurologique (3x/semaine)

boundaries between hospital and primary healthcare –
for the benefit of the patients

arts before or at the time of admission

patient's normal life

INNOVATIONS IN TECHNOLOGY

TRAINING

Medical Training Centre (MTC)

- provides a wide range of cutting-edge medical techniques and biomedical research in optimal learning conditions on a large site (3000 m²)
- evaluating professional practice, acquiring or updating skills in a multidisciplinary team
- simulating a doctor-patient relationship
- attract enterprise by offering an optimal environment to allow spin offs

20

INFORMATICS I

- pilot site for common IT communications and future remote connectivity
- partnered with Orange for security; EU and French funding
- diploma course in health informatics at University of Troyes

Organisational Innovation in Healthcare Management - Agora 2017

21

INFORMATICS II

- joining as part of the 2016 reorganization of health and related care in France (350 000 population)
- 18+ hospitals and units inter link for all relevant services, medical notes, pharmacy, lab results, care plans etc.
- informatics via PCs, laptops, smart phones, bar code readers and
- tablets for applications and modeling

Organisational Innovation in Healthcare Management - Agora 2017

22

INFORMATICS III

- patients data can be sent to previously selected health care related workers (community doctors, pharmacy)
- patient app for health information data management
- relatives of inhabitant residents can be informed through IT links that connect them with care centers
- ALOIS: robot prototype that assists nursing staff and interacts with patients
- apps to record and monitor patients health parameters
